About Battery Innovation Days

The Battery Innovation Days event fosters dialogue among the Research community, Policy makers, Industry players and end-users to ensure a constructive feedback loop towards the definition of research and innovation priorities in Europe.

If batteries are the key enabling technology to reach a zero-emission, responsible and sustainable market, the Battery Innovation Days event aims to increase knowledge and encourage exchange around the deployment of leading-edge technologies in battery materials, cell design, manufacturing and recycling.

Including discussions around *the battery passport; digital twins for manufacturing; how to improve BMS architectures in the automotive industry; the deep revision currently underway to develop post li-on battery technologies*, and much more, the Battery Innovation Days event is a two-day inclusive conference that looks at building a more responsible battery value chain together.

13-14 September

Brussels & online

The Battery Innovation Days event is curated by the key European Research & Innovation initiatives:

About the Organisers

The BATTERY 2030+ is large-scale research initiative that creates a generic toolbox for transforming the way we develop and design batteries in Europe.

IPCEI - Important Project of Common European Interest. It's a transnational project with an important contribution to the growth, employment and competitiveness of the EU industry and economy funded by state aid.

Batteries Europe is the technology and innovation platform of the European Battery Alliance (EBA). It aims to accelerate the establishment of a globally competitive European battery industry, driving the implementation of battery-related research and innovation actions.

The Batteries European Partnership Association (BEPA) is the international non-profit making association (AISBL) representing the private-side of the BATT4EU Partnership. It gathers the European battery community willing to contribute to the ambitious upcoming Research & Innovation Batteries Partnership under Horizon Europe.

CLERENS is a leading public affairs and communications consultancy based in Brussels providing an in-depth expertise in energy, environment, climate and mobility.

Attendee Feedback:

How likely are you to attend the next edition of the BID?

Very likely

How would you rate the event?

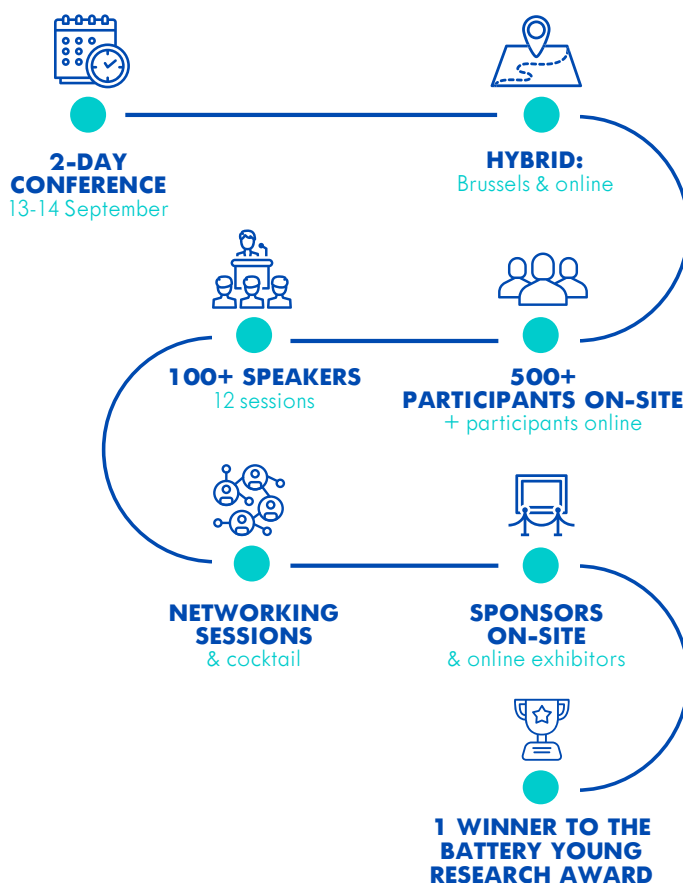

Excellent

What can you expect?

Attracting over 1500 people online last year, this time around the Battery Innovation Days is going to get bigger and better!

The second edition of the Battery Innovation Days will be a 2-day hybrid deep dive into the R&I challenges that must be overtook to stay abreast of the energy transformation, and build a successful and competitive European Battery value chain.

Gain two days of exposure and converse with like-minded industry experts coming from different backgrounds to get a refreshingly different insight!

Why become a Sponsor?

The Battery Innovation Days event brings together numerous key players and experts from the battery field, including policy-makers from the European Commission. Don't miss the opportunity to meet them!

The Battery Innovation Days event presents sponsors with new and maximised forms of sponsorship benefits: the hybrid format of the event combines the best of both worlds offering a mix of virtual and physical branding possibilities. Every sponsor will receive a dedicated area to display their business offer and discuss with industry experts during numerous moments of the two-day programme. Extend your reach and connect with industry representatives from around Europe!

**Network and connect with
industry peers**

Boost brand visibility

**Foster a positive
reputation**

**Stay on top of trends
and technologies**

**Gather valuable data to build
long-term business relations**
